1. Plans are under way for setting up a Czech national research station for the electrical industry.

2. This research station is to be modelled on the Kema at Arnhem and is to include a "Wechsel-und Stoss-Spannungsanlage" (alternating and surge voltage station). For this it is intended to use the powerplant belonging to the C.K.D. (Cesko Morevska Kolben Danek) after it has been suitably developed.

3. A "Kurzschlussstation" (short circuit unit) is also to be attached to the laboratory and Oerlikon has been approached with a view to their supplying one.
